

### What I love about fall...

I like fall for a lot of different reasons like I get to watch my favorite team on football on television. also get to jump in a pile of different colored leaves which is fun. in fall there is halloween which means I get to trick or treat with my friends and when we are all rapped up and done trick or treating we eat all the candy that we got well not all of it. also it has windy weather which makes it less hotter. and that's the last thing I love about fall!
